

LABELING & MARKING

WIND 80/240/330

3000 series

The Wind is a high performance labeler for applications requiring high speed, frequency and precision.

- available in the versions for reel with liner of 80mm / 3.15", 240mm / 9.45" or 330mm / 13" maximum width
- built on a solid aluminium alloy casting. A safe and most robust machine, designed to last over time
- little footprint on the production line thanks to its "vertical" development
- large diameter reel housing for very long duration
- expansion rewriter mandrel
- independent motorized rewriter
- Advanced control unit, which is independent and can be located wherever most practical for the operator (cables length: 3 metres / 9.84 feet)

The advance “approaching end of reel” alarm warns the operators so they can get ready for the replacement.

Arca employ an optical device (without mechanical probes) which does not take up space and needs no operation to be carried out to enable it

To reduce friction, the rewinder disk rotates along with the one way mandrel

The rotating disks have no holes or dangerous openings

The reel securing plaque is transparent, light and takes up little space. Equipped with ergonomic handle, it can be quickly removed with a rotation of only 60°

The 3000 series covers are fixed with “screws you can’t lose”
