

# SINGLE TAG ST-EX P

The most versatile solution for printing on single cards.  
Tested for the most demanding industrial environments.

SINGLE TAG ST-EX, like the previous versions, is born on TOSHIBA TEC engine of the latest generation, it inherits the performance in terms of quality, printing and speed.

SINGLE TAG ST-EX is suitable for the textile sector (information product tags and card information) and for the pharmaceutical sector (instructions for use). Moreover, it is qualified for programming of Tag RfId HF (ticketing, registration and anti-counterfeiting) and UHF (ticketing and logistics).

Compact and versatile SINGLE TAG ST-EX is available in two options: electric sheet feeder with rollers or pneumatic feeder.

Speed	UP TO 12 IPS
Resolution	200/300 DPI
Minimum media width	45mm
Maximum media width	120mm
Minimum media length	60mm
Maximum media length	250mm
Thickness from	140 / 350gr m2

### Pneumatic Version

Exploits the pneumatic hopper to feed the cards taken from the stack, allowing a continuous recharge without downtime of the machine.
